**"Yes" means the product has been properly reinforced for direct planting. "Shelf" means the product was designed with a shelf to support a grow pot and should not be direct planted without proper reinforcement. If direct planting in an item with a "Shelf" designation is needed, we can reinforce for an additional charge. Planters being installed outside should have drainage holes. Planters being installed indoors should be lined with 1 mm plastic. Please contact Customer Service for details.

Ironclad

IRONCLAD

Ironclad Exterior Planters have their color molded into the product. Available in two finishes — Cast Iron and Cast Bronze — Ironclad Exterior Planters also have a textured surface which not only adds to their durability and scratch resistance, it gives the planters a more rustic, earthy look and feel. Ironclad Exterior Planters are a great choice for virtually any outside setting.

EPIC RECLAIMED BARNWOOD

Barns built from Douglass Fir have stood for centuries in some cases. As the barns fall out of use, the wood is reclaimed, then milled to our specifications.

We then cut and shape the wood into square and rectangular panels. The panels are then tightly adhered to strong fiberglass planter shells.

The fiberglass shells are water-tight but holes can be drilled in the bottoms for exterior uses. The fiberglass shells can be painted in any of our standard colors and are also available in two durable, textured, exterior finishes--X-Grey and X-Bronze.

The barnwood remains in its natural, weathered state, with stunning variety and diversity.

Natural Planters

light stone

light stone

LIGHT STONE

Our Light Stone planters and wall panels are made from a combination of natural stone and resin, allowing them to become lighter and more manageable than raw stone would be. We have achieved three very natural looks with our Prairie Brown, Mountain Grey and Seaside Bisque finishes.

Light Stone planters include two perfectly shaped Floor Models, 2 elegant Tall Vases, and one unique Boat which is just the right size for reception desks and conference tables. All 5 of these items are available in all 3 finishes.

We have also designed wall panels for our new BioMontage® line in the Prairie Brown and Mountain Grey finishes. Now what you place on floors and tables can be tied visually to what you place on the walls!

All Light Stone products are for indoor use only. We also recommend using ASI Liners in the Light Stone Planters to insure water-tight performance.

PRAIRIE BROWN

When you look at paintings and photographs of the prairies around North America you see a diversity of landscapes, but they are all tied together by a common element of earth and stone interspersed throughout the widely variable foliage. It is from these scenes that our Prairie Brown finish was born. Its unique texture and subtle blend of earthy colors allows it to work well in almost any interior and with a wide array of plants.

MOUNTAIN GREY

Hiking in the mountains puts you back in touch with nature in a very special way. You see forests and streams and beautiful rock formations that all blend together to create a feeling of calmness and serenity. Our Mountain Grey finish is designed to bring that same feeling indoors! The gentle greys and touches of white with the subtle rock textures create a feeling of nature that we all appreciate and enjoy.

SEASIDE BISQUE

When you walk on a beach along almost any seashore in the world, if you look closely you find small pieces of pumice, a bisque-colored stone formed when volcanoes erupt, often on the sea floor. The pumice is broken up into small pieces and some of it washes ashore for us to find and enjoy. Our Seaside Bisque finish is designed to recreate this experience for us while we are at work! The subtle textures and soothing light color complement virtually any plant and any interior.

Natural Walls

Our Natural Walls are made using a variety of preserved materials from the natural world. Only natural products that are harvested sustainably are selected. Our Natural Walls require no light, water or maintenance to retain their natural beauty.

biomontage®

biomontage®

BIOMONTAGE®

Biophilic Design

- Addresses the human need to be in touch with the natural world.
- Incorporates natural elements into the built environment.
- BioMontage® is a biophilic design product that requires no light, maintenance or water.

NATURAL MATERIALS

Lime Green Reindeer Moss

Medium Green Reindeer Moss

Forest Green Reindeer Moss

Vivid Green Pole Moss

Deep Green Long Moss

BIO MONTAGE®

Our Reindeer Moss grows abundantly in vast Scandinavian forests and is harvested by hand in a way that ensures perfect renewal of the plant. The moss is preserved naturally and is 100% biodegradable and is also fire retardant. Reindeer moss is a very efficient acoustic modulator, making it a perfect biophilic design element in public places and offices.

Our Light Stone panels are made from a combination of natural stone and resin, which is lighter and more manageable than raw stone. These naturally attractive panels come in two finishes which complement any interior: Prairie Brown and Mountain Grey.

Our sustainable Yellow Poplar tree bark comes from the Appalachian Hardwood Region of the U.S. The poplar wood is used for furniture production but the bark has limited practical uses. BioMontage® helps prevent the bark from becoming waste. Our bark also has excellent acoustic properties.

Harvested sustainably by hand in the forests of France, and preserved naturally, our Vivid Green Pole Moss presents a three dimensional, natural texture in a distinctive, long lasting color.

When the Coconut tree can no longer produce its famous fruit, the tree is harvested and used in building construction and furniture production. The "Coco Bark," has very few uses and is often discarded. We hand-craft the small pieces into beautiful natural panels that fit perfectly into our BioMontage® system.

Harvested in a natural, sustainable way in the forests of Turkey and preserved naturally, Long Moss is an elegant, cost-competitive alternative to Flat Moss. Long Moss holds its deep green color very effectively in virtually any interior environment.

The Mangium Tree is used primarily in furniture production. Branches are periodically cut from the tree and could easily become waste. We slice and trim the branches into small tiles, then combine the tiles to create a stunning natural mosaic which is an exciting new addition to the BioMontage® range.

planter trays

PLANTER TRAYS

Our original fiberglass planter trays can be painted in any Earth Forms Finish.

Planter Tray The essence of the Simply Vertical system is the Planter Tray. Designed for mounting directly to the wall, the tray holds virtually any 6" grow pot and is easily planted and replanted. Planter Trays are available in three sizes — 24"L, 36"L, and 48"L — allowing the creation of walls of many different dimensions.

Wicked Grow Pot in Tray with Water Wicks have long been a successful method for extending watering cycles in commercial environments. By applying wick technology to a tilted grow pot, watering cycles of 10 days to 4 weeks can be achieved. Simply add the specified amount of water to each tray and allow the tray to go empty for a few days before watering again.

Planter tray	Description	Number of Trays/ Shelves	Tilt Number of 6" Plants	Total Amount of Water Per Unit	Approximate Weight (lbs.) Fully Planted/ Watered	Approximate Coverage When Planted* (Square Feet)	Tray Height	Distance (Inches) Coming Off Wall	
								Unplanted	Planted*
PT-24	Planter Tray 24" L for 6" Plants	1	2-3	1.5 to 2 qts.	12 to 16 lbs.	1.25 to 1.5	7.5	8.5	12-24

SUB-IRRIGATION

Air and Water Directly to the Roots

Designed in conjunction with Dr. Joseph Cialone, Ph.D., Horticultural Sciences.

2" taller than standard grow pots for easy transfer of root ball with no plant trauma.

Fits the same decorative containers as standard grow pots.

Convenient Water Level Indicator lets you know whether to water or not.

Air holes and Light Expanded Clay Aggregate (LECA) provide excellent air and water supply.

Intallation and Use Instructions

1. Assemble unit as shown on page 134.
2. Pour LECA onto shelf and distribute evenly.
3. Remove plant from grow pot and transfer to ASI Sub-Irrigation pot. Push down firmly.
4. Pour water through fill tube until water level indicator is at "F."
5. Water plant as needed (normally every two to three weeks)*

* Watering Cycle will vary depending on type of plant, humidity, light level and growing medium. More frequent watering may be necessary during the first month.

Sub-Irrigation System	Top Outside Diameter	Outside Height	Base Outside Diameter	Transfer from	Water Reservoir Capacity
SUB-06	6.5	6.5	5.25	6" Grow Pot	.75 quarts
SUB-08	8.75	8.75	7	8" Grow Pot	1.4 quarts
SUB-10	10.6	10.4	8.1	10" Grow Pot	1.9 quarts
SUB-12	12.25	12.5	9.5	12" Grow Pot	2.5 quarts
SUB-14	13.9	14.2	10.6	14" Grow Pot	3 quarts
SUB-17	17.2	16.5	13.4	17" Grow Pot	5 quarts

1. Water Level Indicator
2. Cap
3. Fill Tube
4. Internal Shelf
5. Water Reservoir
6. Wicking Area
7. ASI Hard Liner
8. LECA
9. Plant Root Ball

For outdoor use, drill several 1/4" holes around the circumference of the pot, 2.5" up from the bottom.

L I N E R S

RECOMMENDED FOR DIRECT PLANTING AND
HYDROCULTURE APPLICATIONS

Flexible Liners Fit Round and Square Shapes

Seven Sizes Fit ASI Products up to 26"

Manufactured in Black For Easy Camouflaging
